DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 9-12, filed 9/28/2006, with respect to claims 1-27 have been fully considered and are persuasive. In addition, Applicant has provided evidence in this file showing that the invention was owned by, or subject to an obligation of assignment to, the same entity at the time this invention was made, or was subject to a joint research agreement at the time this invention was made. The rejection of claims 1-24 has been withdrawn.
2. The examiner agrees that Alexander is not prior art to the present application and is removed as a prior art reference.

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 25-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. A computer data signal embodies in a carrier wave is non-statutory.

Allowable Subject Matter

2. Claims 1-24 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter: Independent claims 1 and 13 uniquely identify a re-compression scheduler

Art Unit: 2621

which is repeatedly activated, selects programs satisfying the re-compression condition among the recorded data of programs in the recording unit, and designates the encoding method used in the compression of the selected programs by referring to the compression setting storing unit. The closest prior art fails to anticipate or render the above obvious.
